- Scale plot values within the graph, and the number of cycles (vertical scale) of the graph.
- Plot additional quarterly results, and project data from the most recent quarter versus last year.
- Customize plot colors used in the Graph
- Easily omit outliers by clicking on year labels
- Omit individual High or Low PEs by clicking on a cell of the Price and Earnings History table.
- Performs the Preferred Method calculations.
- Plot company performance per quarter and per trailing twelve months

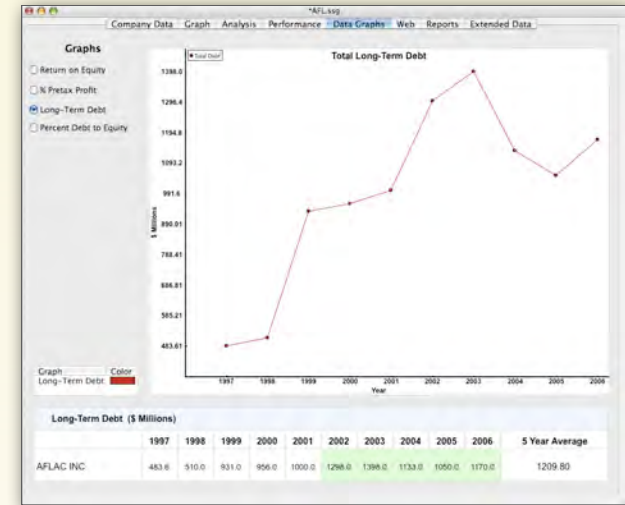

## COMPANY PERFORMANCE GRAPHS

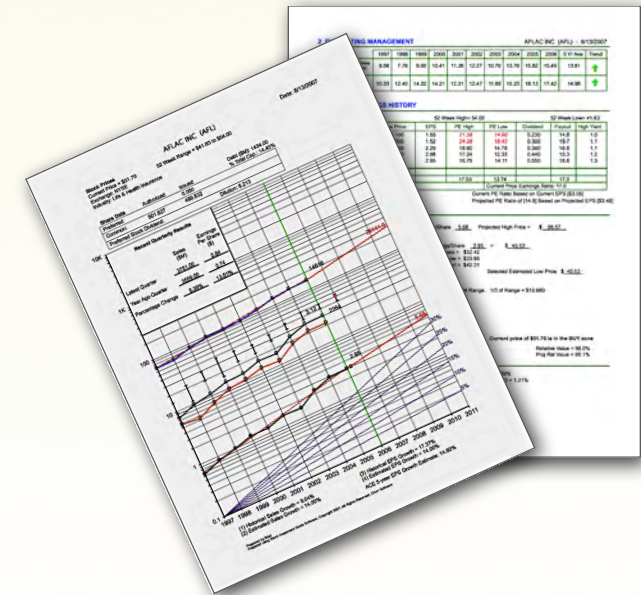

The **Stock Investment Guide** provides users with easy-to-use tools to use historical stock data to analyze historical growth trends, project earnings, and sales, and determine Buy, Hold, and Sell prices.

Using **SIG** is really easy. Our software integrates fully with the National Association of Investors Corporation (NAIC) online stock data. Users may also use stock data from StockCentral.com. If you aren't a NAIC or Stock Central member (both are subscription services), you can also use **SIG** to grab free stock data from the internet (free internet data sources do not normalize EPS).

**SIG** works with the internet in unique ways, using exclusive features to understand the quality of potential investments. Users can view historical price graphs, research company news, research competitors, view SEC filings, get earnings estimates, and research technical analyses on the internet.
